

10 February 1965

**NOTE FOR THE RECORD**

I called Dr. Brockway McMillan today regarding a discussion that had taken place after a recent NRO meeting between Mr. McCone and Dr. McMillan (Mr. McCone addressing him as Under Secretary of the Air Force) regarding modifying some B-26B's and perhaps keeping them in the inventory.

Dr. McMillan said that they had not "taken any overt action yet" but that they were looking into the proposal and should be able to report on it in a week. He added that the Air Force sometimes resents outsiders telling them what to fly but that he had not heard any comments indicating this regarding this proposal.
